

The imposing and artistic setting of the Golden Gate Bridge across the Golden Gate can only be appreciated by those who have viewed the sight. This 4200 foot single span structure built at a cost of \$35,000,000.00 is the connecting link between San Francisco and the Redwood Highway Scenic Wonderland. It brings the rich Northern counties of California closer to the Metropolitan markets of the San Francisco Bay area by direct rapid automotive transportation. The bridge accommodates six lanes of vehicular traffic and two ten foot sidewalks.

BRIDGING THE GOLDEN GATE, SAN FRANCISCO, CALIF.
